- Enhanced Customer Services
- Extensive Reports

PROBILZ – Retail Management System (RMS)

Vanuston Intelligence, a privately held firm providing high quality IT business solutions in selected vertical segments by combining the domain expertise, process-driven technology skills and a commitment towards long-term client relationships.

The industry is totally changing towards managing data and information, and the business need to be fully aware of sales, purchase, margins, changes in price, scheme, visibility on stock movement, expiry, non-performing products, cash flow and fund disbursement, and Customer relationship and loyalty for improved profitability and sustainability.

PROBILZ-RMS is a comprehensive retail management solution that provides end-to-end solution for retailers to manage outlets more efficiently, increase profitability, and support day to day processes effectively. PROBILZ automates the store operations, improves efficiency and has an extensive range of features like Inventory management, CRM, and Business reports integrated with accounting.

The screenshot displays the PROBILZ Retail Management System interface for 'ABC Super Market'. At the top, there is a navigation menu with options: Home, Sales, Inventory, Masters, Finance, CRM, Help, and Web Store. A dropdown menu is currently open, showing '<-SELECT->'. The main content area features a large illustration of a blue egg character pushing a shopping cart. To the right of the illustration, a list of key features is displayed with blue arrow icons:

- Multi-level Inventory Control
- Built-in Customer Relationship Management (CRM)
- Alert Management
- Retail Point of Sale (POS)
- Integrated Accounting and Reporting

At the bottom of the interface, it states 'Powered by Vanuston™', 'Server', and 'Current User: admin'.

THE SOLUTION

Vanuston's Retail Management System (RMS) is delivered as a desktop/client-server application allowing Retail businesses to get up and running quickly and does not require much technical assistance. Unlike other solutions, RMS has a simple and easy user interface which makes learning the application simple and straightforward.

OUR VALUE

- Quick-to-deploy inventory and Retail management system (RMS)
- Affordable solution with low total cost of ownership
- On-demand dedicated customer support and technical team
- Free Online Support and personalized assistance

OUR CLIENTS

- Grocery & Supermarket
- Apparels & Footwear
- Electricals & Hardware's
- Optical

THE BENEFITS OF RMS

- Faster inventory turns
- More efficient use of store operations
- Reduction in inventory paperwork
- Improved reorder levels and ordering
- Enhanced customer service
- Improved labor productivity

RMS Competitive Advantage

Faster inventory turns – reduce lead times by limiting inventory movement and improving the accuracy of inventory records

More efficient use of available store space – lower inventory costs by increasing available store space by more efficiently locating items in relation to receiving, packing, and delivery

Reduction in inventory paperwork – significantly reduce paperwork traditionally associated with store operations (e.g. receiving orders, arranging stocks), as well as ensure timely and accurate flow of inventory and information

Improved reorder levels and ordering – capture relevant data (e.g., frequency of movement, stock locations, etc.) to systematically schedule reorders. Such reorder level not only can improve the accuracy of inventory for ordering, but also can eliminate or reduce the need for complete, costly physical inventories

Enhanced customer service – streamline processes from order to delivery, accurately determine product availability and realistic delivery dates, and process returns efficiently

Improved labor productivity – maximize efficiency while reducing labor costs by incorporating several inventory checks quickly or by reducing inventory handling

PROBILZ – RMS Modules
